DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 59-73 are, drawn to a process for preparing a partially protected procyanidin dimer, classified in class 549, subclass 399+.
- II. Claims 74-78 are, drawn to a process for benzylating the phenolic hydroxyl of catechin or epicatechin monomer, classified in class 549, subclass 453+.
- III. Claims 79-83 are, drawn to a process for preparing a branched procyanidin trimer, classified in class 549, subclass 406+.
- IV. Claims 84-89 are, drawn to an additional process for preparing a procyanidin dimer, classified in class 549, subclass 441+.

The inventions are distinct, each from the other because of the following reasons:

Groups I-IV are drawn to four distinct processes of preparing various compounds as demonstrated by the different reactive steps and reactants. Additionally, the inventions of Groups I-IV are independent and distinct because there is no patentable co-action among the various groups and a reference anticipating one member will not necessarily render another obvious.

In addition, because of the different classes and subclasses and divergent subject matter, in each of the Groups, a serious burden is imposed on the examiner to perform a complete search of the defined areas. Therefore, for the reasons given

Art Unit: 1626

above, the restriction set forth is proper because it would constitute an undue burden on the examiner to examine all of the inventions in this application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Margaret B. Kelly on 01/13/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to E. Sackey whose telephone number is (571) 272-0704. The examiner can normally be reached on Monday-Friday from 7:30 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane, can be reached on (571) 272-0699. The fax phone

number for this Group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1600.
